Subject: EtO facilities in elevated risk tracts
Attachments: facs in high risk tracts with EtO emissions.xlsx

Here are the facilities that have EtO emissions in the 106 tracts nationwide with total risk ≥ 100 in a million. The list does not include facilities that may be just outside a high risk tract and potentially drive the risk of that tract. I have joined all the tract risk data to the list of facilities for the tract it is in.
This was all done by the map app, but don't try this at home.
